

Brief List of SRS Changes

August 7, 2018

Due to unforeseen complications with our original SRS domain name (iep.unl.edu), we have been forced to switch SRS over to our new domain name "iep.nebraskacloud" sooner than we anticipated. We have made it so the original site will re-direct you to the new site, but we would highly recommend resetting your bookmarks on the login screen of the new site whenever you get the chance.

This process involves decommissioning our oldest SRS server which still supported some of the old-style SRS webpages. Below you will see a list of the pages that have been updated recently along with a description of how the pages are different.

- **Log-in Screen** – This page has been replaced with a newer version. It will look a little bit different but should function exactly like the original log-in screen.
- **Original Personnel Screen** – This screen was actually replaced with two screens. On SRS, you will now see a tab labeled Personnel and Staff Search. The Personnel tab is designed to produce lists of staff based on their school building. The Staff Search tab will allow you to search for personnel by first and last name.
- **Original Student Search** – We have replaced this with our newest version of the Student Search screen. This new search screen has all of the functionality of the original, but with additional features such as batch processing, data exports, and customizable search results.
- **Initiate Student Transfers** – We have replaced the original "Initiate Transfer" screen with the batch processing method which is located on the Student Search Tab. Here is a quick procedure for initiating a student transfer.
 1. Go to the Student List page (Student Tab)
 2. You need to have at least one collection set up. If you don't have a collection set up already, look on the left side of the screen for a link that says "Add Collection". You will be asked to name the collection, and then click the CREATE button.
 3. Next search for the student(s) you wish to transfer. You will see a checkbox to the left of each student's name. Check the box for each student you wish to transfer. You will see each checked name appear in the collection box on the left side of the screen.
 4. Find the menu labeled "Select Group Actions" from the collections bar and select the option "Transfer Students".
 5. A pop-up screen will appear. Select the school where you want to transfer the students and then click the "Transfer" button. The student transfer will be initiated immediately.
- **Original School Tab** – We have a replacement page that looks a little different than the original, but it will function in the same way. Simply enter the name of your school

district into the search bar, and you will see a display of all the schools in that district. You can click on any school name to view that school's profile page.

- **Original Districts Tab** – The replacement page will provide links to your District's profile page and ADVISER report. Additionally, you can look up the personnel from other school districts and give them privileges to your district directly.
- **Welcome Screen** – The welcome screen has been replaced with a nearly identical version of the original.
- **NSSRS Report** – This is the only screen that we haven't replaced. The State has eliminated the NSSRS report and replaced it with ADVISER which SRS now supports. So all data transmissions to the state can be maintained by switching over to the ADVISER system.
